

## Forum papers

### Papers related to the Finance Forum

In the latter half of 2008, Global Connections conducted a survey amongst Christian organisations with the aim of ascertaining salary levels and benefits enjoyed by UK-based staff.

This report is the culmination of that survey and contains some important and at times surprising results. The areas covered include salaries paid to a diverse range of staff, large town and London weighting, pension provision, use of volunteers, and mileage allowance. The results are set out in a clear and concise manner with graphical illustrations. Key results are highlighted within the text.

First published in May 2009, this report is an essential read for all trustees and CEOs involved in setting staff remuneration levels. Click the image to find out more...
